

1989a

“Identification of Vibrational Modes for a Non-Rigid Spacecraft,” M. D. Shuster, *Proceedings, Pan-American Congress of Applied Mechanics*, Rio de Janeiro, Brazil, January 3–6, 1989, pp. 705–708.

This work has little real content beyond the material already contained in 1983b, 1983e and 1984b. I never performed any simulations.
